2015

Latar belakang

Kertas merupakan barang yang sangat dibutuhkan dalam kehidupan sehari-hari. Kertas telah menjadi kebutuhan pokok dalam berbagai bidang, misalnya bidang pendidikan, perkantoran, dan lain sebagainya. Dalam bidang pendidikan atau dalam menjalankan kegiatan pribadi misalnya, kertas mutlak dibutuhkan bagi seseorang untuk berbagai keperluan.

Saat ini pemanfaatan teknologi komputer merupakan bagian penting dari hampir seluruh masyarakat dalam menjalankan aktivitas. Bahkan penggunaan teknologi dapat digunakan untuk mengurangi pemakaian kertas (paperless) dalam kegiatan perbankan, perkantoran, pendidikan hingga kegiatan pribadi.

Salah satu kegiatan pribadi yang banyak dilakukan dengan masih menggunakan kertas adalah kegiatan mencatat seperti mencatat nomer telepon / informasi kontak seseorang, *to-do list* hingga cerita kehidupan yang dialami oleh pengguna di kesehariannya.

Dari permasalahan di atas penulis ingin merealisasikan sebuah aplikasi berbasis web yang akan membantu mengurangi pemakaian kertas bagi user dalam mencatat kegiatan pribadi seperti menulis informasi kontak seseorang dan *e-diary* yang berjudul "Remember Me".

Rumusan Masalah

- Bagaimana cara mengurangi penggunaan kertas
- Dampak penggunaan kertas yang dapat merusak lingkungan
- Bagaimana cara mengimplementasikan program komputer berbasis web yang dapat mengurangi penggunaan kertas

Tujuan Aplikasi

- Mengurangi penggunaan kertas bagi kegiatan mencatat pengguna
- Menciptakan program yang dapat membantu pengguna dalam kegiatan catat mencatat

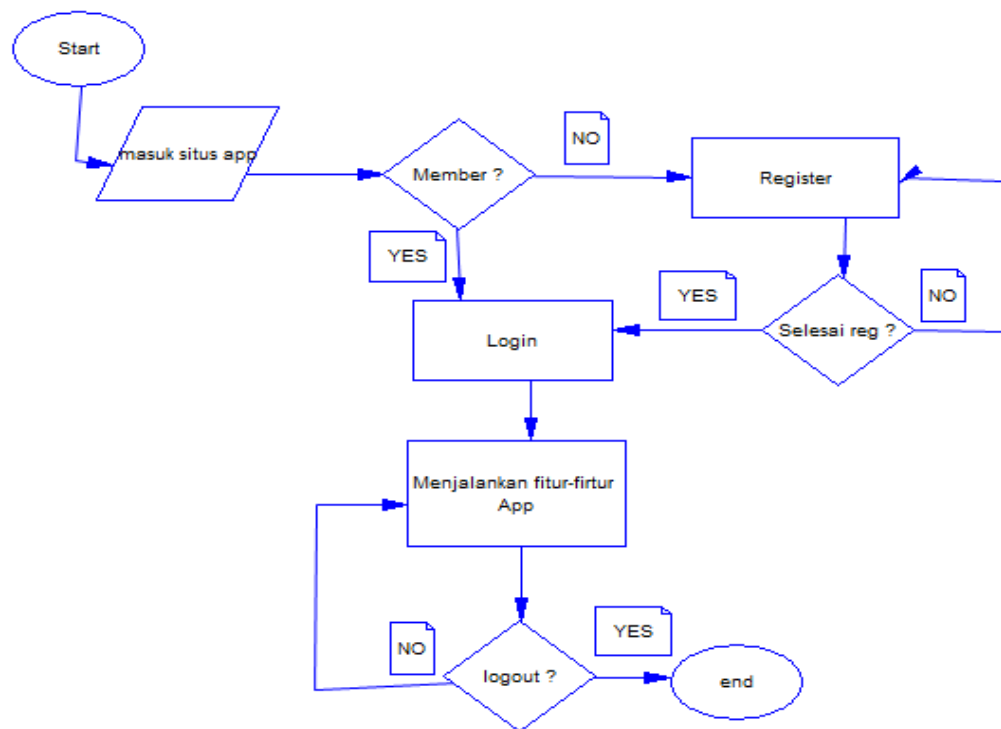

Kegunaan Aplikasi

- Mencatat kegiatan pribadi, catatan pembelajaran dan informasi kontak seseorang

Feature Aplikasi

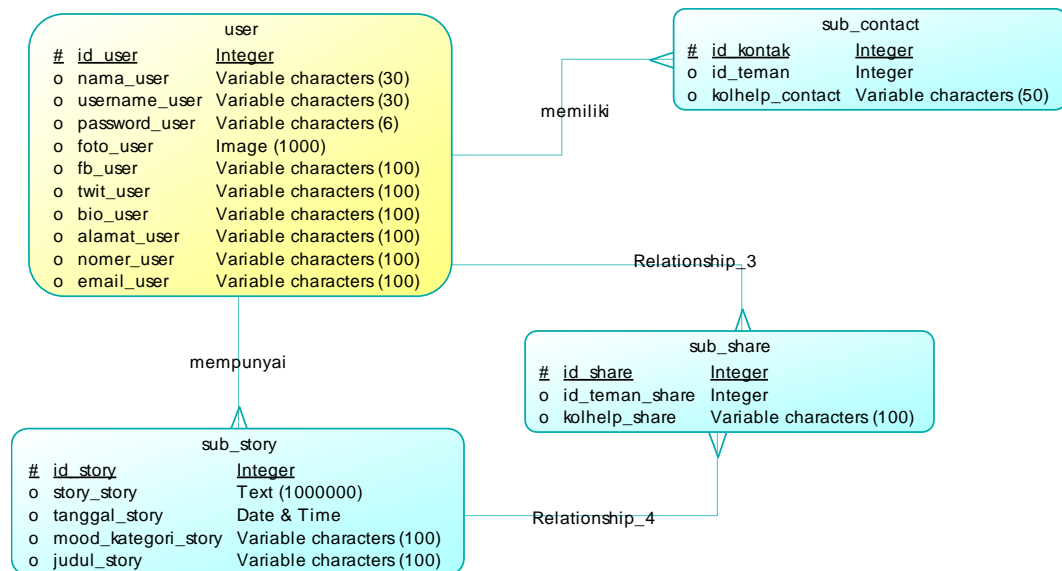

- User dapat menulis catatan harian (diary, catatan sekolah) dan bisa juga mengedit serta menghapus catatan.
- User dapat menyimpan kotak informasi seseorang (kontak / informasi diri orang lain bisa di dapatkan dengan memasukkan username user lain)
- Berbagi catatan kepada user lain.
- Melakukan pencarian (quick search dan pencarian biasa)

Delete Diary

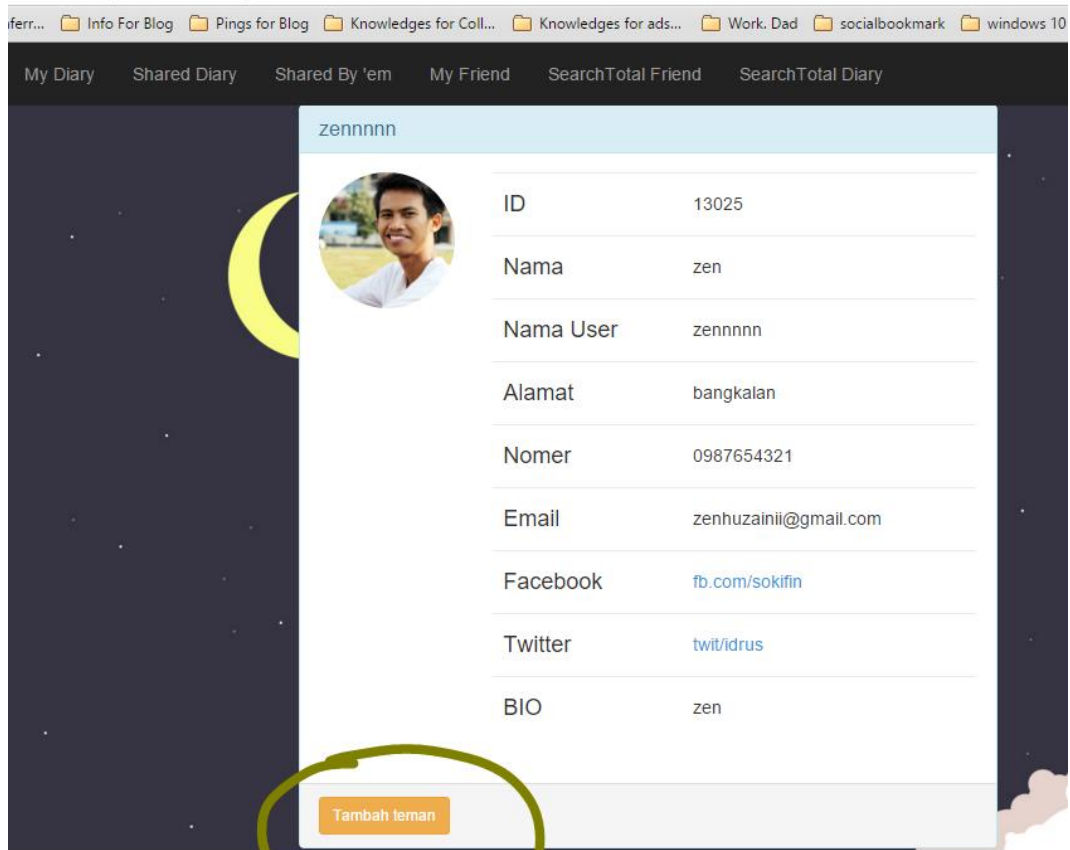

Tambah Teman

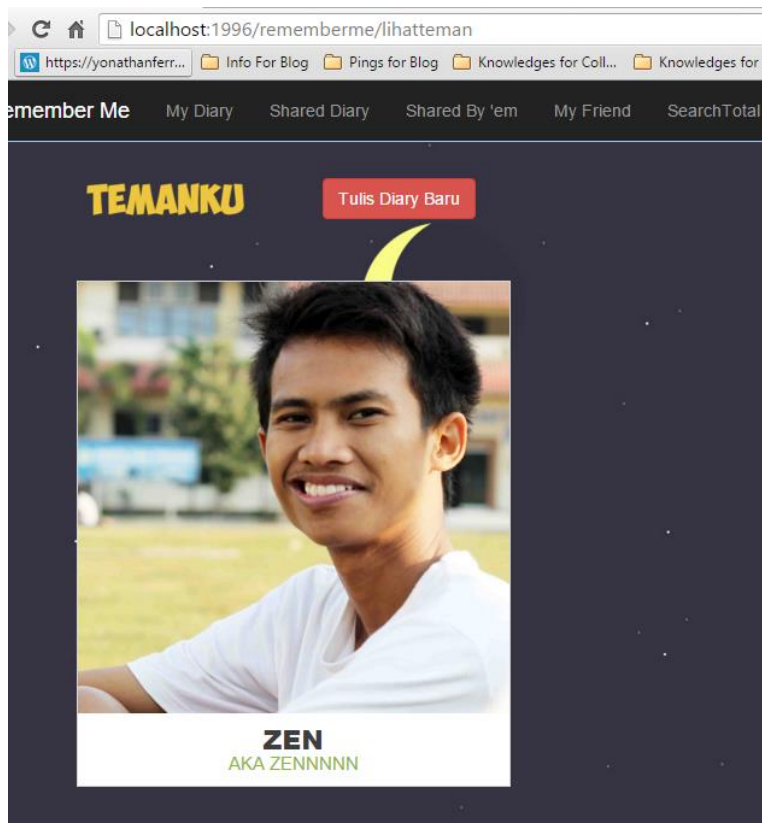

Menggunakan pencarian dengan superfast search

Menampilkan user dan menambhkannya

Setelah menambahkan teman maka akan masuk ke database

Share Diary

Share hanya bisa dibagikan ke orang yang di tambhakan menjadi teman

zennnnn

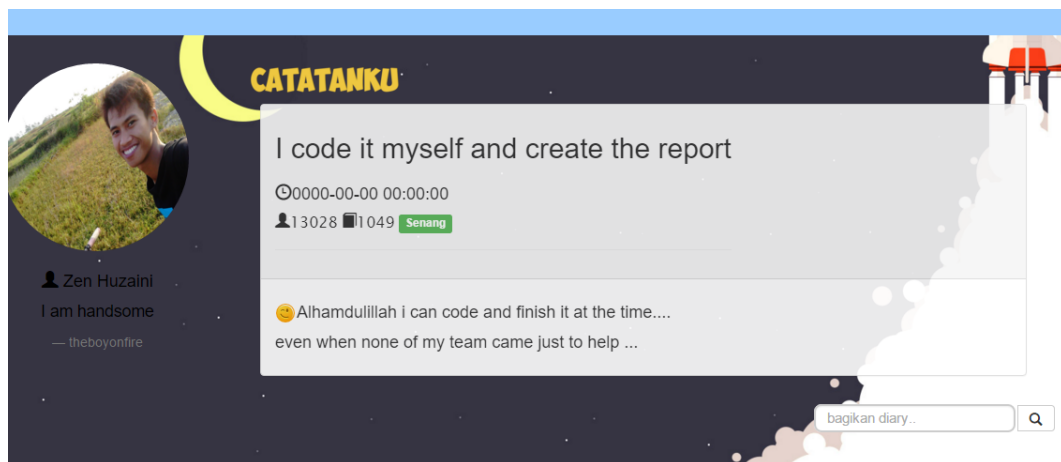

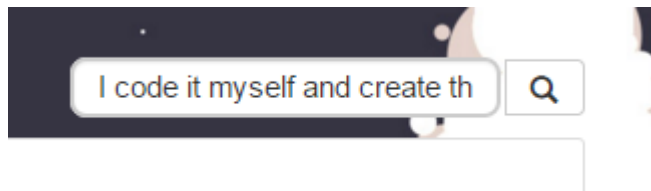

Lihat data yang di share ke org lain, apakah bisa di baca

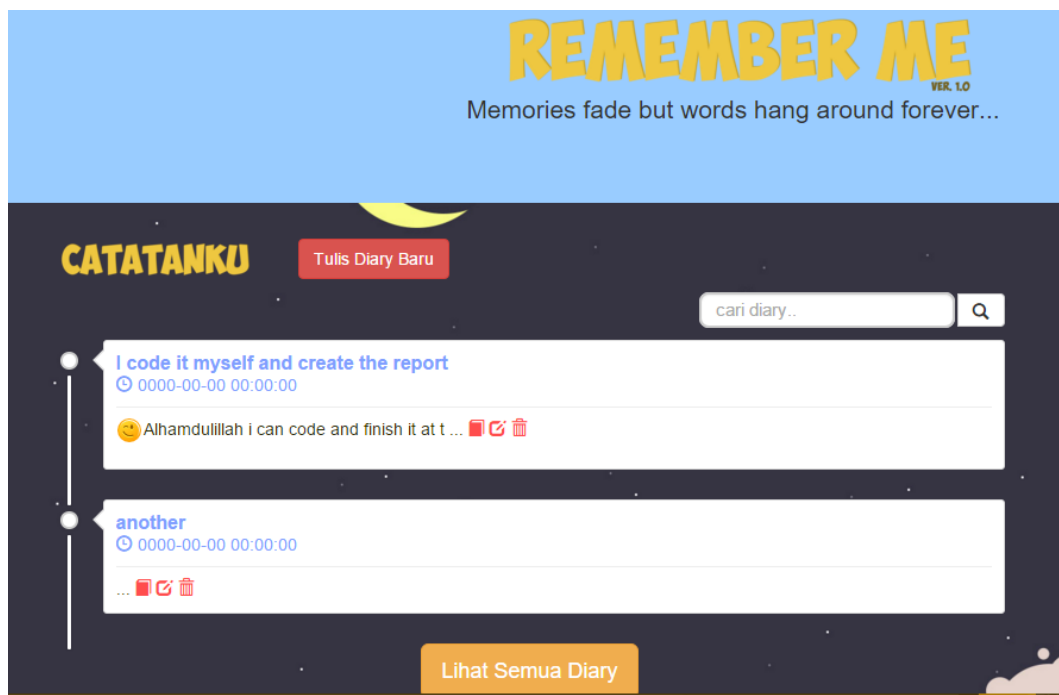

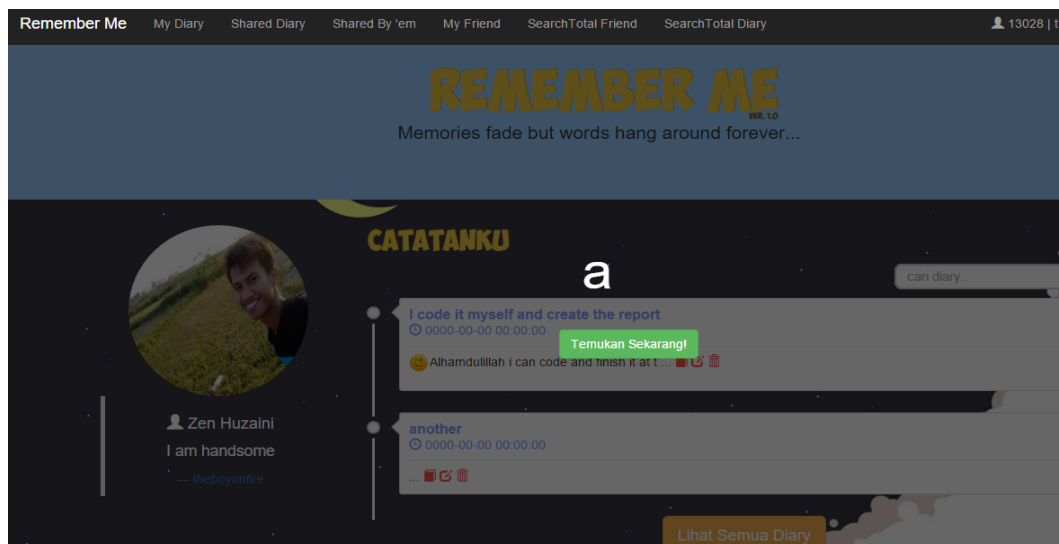

Pencarian Diary

SuperSearch : pencarian langsung dengan ajax dan akan langsung membaca data

TotalSearch : pencarian biasa

Akan di tampilkan yang sesuai dengan inputan yang di masukkan dan user bisa memilih untuk membaca yang mana

Pencarian User

SuperSearch : pencarian langsung dengan ajax dan akan langsung membaca data dan masuk ke profil dari user yg dicari
